

Slide 1 - Slide 1

# Archives and Records Centers Information System (ARCIS)

Creating an ARCIS Records Request using the Copy Function

## Slide 2 - Slide 2

This module demonstrates the process of using the Archives and Records Centers Information System (ARCIS) customer agency portal to create a reference request by copying a previously created request. This process will save time when submitting multiple requests for records or containers from the same records transfer.

If not already complete, view the module "*Submitting an ARCIS Records Request*" prior to watching this module.

Use the Back and Continue buttons near the bottom of the screen to navigate this presentation.

*Duration: 4 minutes*

Back

Continue

## Slide 3 - Slide 3

**Continuous improvement efforts may result in minor differences between items shown in this module and the actual production system.**

**However, the differences will be minor and should not affect the value of this module in demonstrating how to use ARCIS.**

[Back](#)[Continue](#)

## Slide 4 - Slide 4

**During this module we will use the following scenario.**

You need boxes 8, 9, and 10 from records transfer PT-015-2008-000817.

You have already completed data entry and submitted a request for box 8.

You now would like to submit requests for boxes 9 and 10 without making redundant data entries.
